WE ARE CONDUCTING A SMALL STUDY OF ADOLESCENTS WHO LIVE AT HOME WITH A PARENT WITH YOUNG-ONSET DEMENTIA (YOD)

THE IDEA
• There are over 1.5 million individuals living with YOD in the U.S.
• Few studies have highlighted adolescents’ experiences of living with a parent with YOD.
• Little is known about the details of these adolescents’ lives, including their involvement in caregiving, how they navigate changes in family structure, and how their overall experiences shape who they are as individuals.

PURPOSE
• The goal of this study is to describe the experiences of adolescents living with a parent with YOD and how their experiences shape their developing identities.
• Your adolescent will be asked to complete a brief online questionnaire as well as a 60-minute interview via Zoom.
• The interview is focused on understanding your adolescent’s overall experiences, including their potential involvement in caregiving.
• Your adolescent will receive a $25 Visa gift card for their participation.
